

# Saskatchewan Consumer Price Index

December 2014

---

According to Statistics Canada, the Saskatchewan All-items Consumer Price Index decreased 0.5 percent between November 2014 and December 2014 while the Canada All-items Index declined 0.7 percent. The Regina and Saskatoon All-items Consumer Price Index both fell 0.5 percent, during the same period.

In Saskatchewan, the December All-items Index decreased from November 2014 primarily due to lower prices for gasoline, women's clothing, men's clothing and furniture. Prices also fell for dairy products, fuel oil and other fuels and traveller accommodation.

Moderating these decreases were higher prices for purchase and leasing of passenger vehicles, food purchased from restaurants, non-alcoholic beverages and non-prescribed medicines. Prices also increased for fresh vegetables, fresh or frozen pork and reading material and other printed matter (excluding textbooks).

The Saskatchewan All-items Consumer Price Index advanced 1.7 percent between December 2013 and December 2014 while the Canada All-items Index increased 1.5 percent. The Regina and Saskatoon All-items Consumer Price Index climbed 1.6 percent and 2.0 percent, respectively, during the same period.

The December All-items Index increased from December 2013 primarily due to higher prices for natural gas, passenger vehicle insurance premiums, purchase and leasing of passenger vehicles and fresh or frozen beef. Prices also increased for food purchased from restaurants, electricity and processed meat.

These increases were partially offset by lower prices for gasoline, travel tours, home entertainment equipment, parts and services and furniture. Prices also decreased for women's clothing, fuel oil and other fuels and other fresh or frozen poultry meat.
